

Six rules for an AI you can trust with your books.

How Ledger Book keeps a language model useful — and out of the journal.

RULE 1

The model proposes. It never posts.

AI output is a proposal. A deterministic posting service validates every entry before it reaches the journal.

FIGMA * MONTHLY

2026-08-12 · Amex ···3009

6210 · Software subscriptions

suggested

Why: Matches your past Figma charges, every one categorized as Software subscriptions

Approve

Not mine

SQ * BLUE BOTTLE OAK

2026-08-11 · Amex ···3009

6300 · Client meals

suggested

Why: Similar to a past Blue Bottle charge you marked Client meals — but larger than the usual one, so it is here rather than posted

ZELLE FROM R. NAKAMURA

2026-08-11 · Chase ···4821

4100 · Consulting fees

suggested

Why: \$1,200 matches #2026-038 (Beacon Health) exactly, but the payer reads as Nakamura, whose open invoice is #2026-042 (\$1,100). The amount points one way and the name the other. Needs a human.

This may be settling something you already recorded. An open invoice is close enough to this to be what it paid. Exact matches are listed first.

Settles #2026-038 · Beacon Health

► Paying several invoices? Tick the ones this \$1,200.00 covers (3 open)

RULE 2

Show the reason, not just the answer.

Every suggestion carries a confidence score and a plain-English why. Below the threshold, a person decides.

HOW A SUGGESTION IS ROUTED

0.95 and above

posts on its own — still balanced, still reversible

below 0.95

waits in Review for your Approve or Not mine

conflicting evidence

says why, and asks a human

RULE 3

Debits equal credits. Enforced, not hoped.

Integer cents, balanced entries across two or more lines — checked by the engine, not by a prompt.

Workshop facilitation fee

Dr	1000 Checking	2,150.00	
Cr	4100 Consulting fees		2,150.00
Debits = Credits		2,150.00	2,150.00

posted · immutable

RULE 4

Posted means posted.

Entries are immutable. Corrections are reversals — both stay on the record.

Hide corrections

Nothing here can be edited. A posted entry is immutable — a correction is a second entry that reverses the first, and both stay on the record. Entries you typed can be reversed from this screen; ones a document, payment or bank line produced are corrected where they were made, so the document stays right too.

DATE	ENTRY	AMOUNT	STANDING
Aug 13, 2026	Workshop facilitation fee (paid same day) Dr Checking · Chase ···4821 \$2,150.00 Cr Consulting fees \$2,150.00 via seed	\$2,150.00	stands History
Aug 13, 2026	August software subscriptions to date (remainder) Dr Software subscriptions \$253.00 Cr Checking · Chase ···4821 \$253.00 via seed	\$253.00	stands History
Aug 13, 2026	August contractors to date (remainder) Dr Contractors \$750.00 Cr Checking · Chase ···4821 \$750.00 via seed	\$750.00	stands History
Aug 13, 2026	August client meals to date (remainder)	\$42.50	stands

RULE 5

Store nothing you can compute.

Balances and reports are derived from the journal on demand, so every screen agrees.

AUGUST 2026

August 2026: \$9,400.00 in, \$2,240.00 out, leaving \$7,160.00 profit — about 76% margin. That is down \$4,570.00 on July 2026.

Holding \$44,830.00 in cash. Projecting forward, the thinnest week over the next 13 is \$46,602.50, which stays positive.

You're owed \$3,950.00 across 3 open invoices, 1 of it overdue. Nothing owed back.

Set aside \$7,449.00 for tax on a cash basis; currently holding \$3,120.00, \$4,329.00 short.

6 transactions worth \$1,318.20 waiting in the review queue.

Worth a look: ADOBE CREATIVE CLOUD rose \$22.00 → \$34.00 since Jun 8 — \$144.00 a year if it stays.

2026-06 is not ready to close — a client is waiting on a reminder.

RULE 6

Give the copilot read-only tools.

It can look up profit, invoices, runway and unusual activity. No tool exists that can post, send or move money.

AI proposes. The ledger disposes.
