

TEST-PREP MYTHS

Four things *nobody should tell you.*

Busting the advice that keeps students busy
instead of improving.

SWIPE • 4 MYTHS

MYTH 1 / 4

~~More practice tests will raise my score.~~

FACT

Practise what pays.

GoalGap ranks your weak skills by the points they can still give you — so the next hour goes where the score can move.

MYTH 2 / 4

~~A diagnostic is just another test.~~

FACT

A scan is a map.

It shows where points leak, by skill and by section — before you spend a single hour.

~~A missed question is just a missed question.~~

FACT

Every miss comes back.

Misses flow into a review log and spaced repetition, so the same trap gets fewer chances.

~~Pacing is something you figure out on test day.~~

FACT

Rehearse the clock.

Timed full-length mocks, with Standard, 1.5× or 2× time accommodation, and the time spent on every question.

Lock the goal. *Own the score.*

Practice test 1 of each exam is free with an account.
