

A FIELD GUIDE · 2026

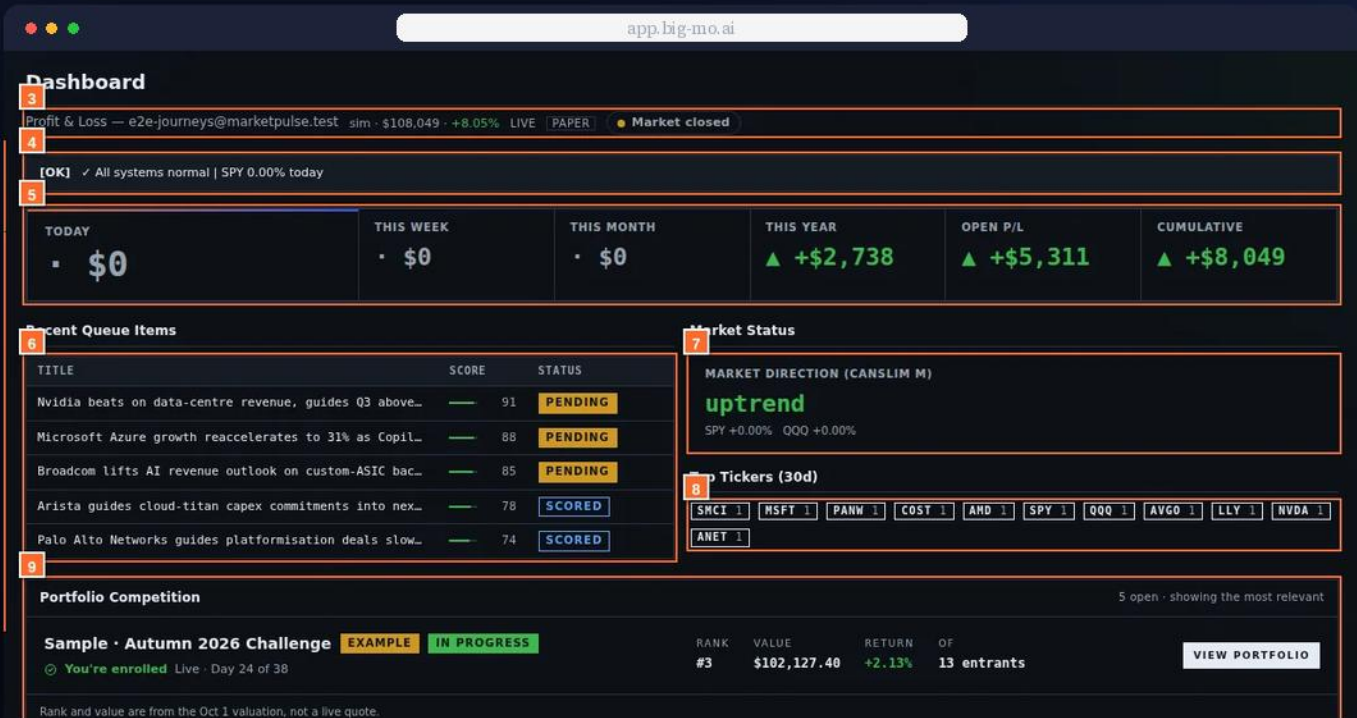

Agentic trading, with brakes.

How AI MarketPulse separates what AI is good at (reading) from what code must own (deciding).

AI MarketPulse
AND TRADING AGENT

Ingest. Understand. Gate. Execute. Observe.

Each plane has one job, and the risk plane sits between AI and the broker.

Every source, one queue.

RSS, Gmail, Outlook, IMAP, WhatsApp, Telegram, Reddit, SEC EDGAR — scored and de-duplicated.

CITATIONS

news: [MI350 ramp pulled forward one quarter per OEM partners](#)

Research, debate, verdict.

Analysts argue bull and bear; a signed guardrail report records which rules passed, warned or blocked.

app.big-mo.ai

Guardrail Effectiveness (what fired & what blocks were worth · 7d / 30d)

RUNS 7D / 30D	BLOCKS 7D / 30D	WARNS 7D / 30D	EST. NET (30D)
5 / 5	5 / 5	0 / 0	\$0

RULE	MESSAGE	FIRES 7D	FIRES 30D
RISK-103 BLOCK	Account trading state is not ACTIVE (halted / needs recon / safe hold)	5	5
TG-002 WARN	Risk/reward below 1.5:1	5	5
EXP-001 WARN	Approaching a per-symbol or per-sector exposure cap (≥80% of limit)	4	4
EXP-002 BLOCK	Trade would push a symbol or sector over its exposure cap	4	4
TG-005 BLOCK	Brain confidence below 0.50 threshold	2	2

Block counterfactual (30d): 0 of 5 blocks priced · saved \$0 · missed \$0 · net \$0

Counterfactual marks each blocked BUY to the latest quote (entry-at-block vs price now). It is a mark-to-market estimate, not realized P&L.

 AI Market Pulse

5 / 8

17 gates.

No bypass.

Pure-arithmetic pre-trade checks in a <50 ms budget. Human overrides skip advisory checks — never the risk core.

app.big-mo.ai

Risk Cockpit

Server-enforced risk limits · kill switch · paper/live boundary. Risk control is the product.

1

KILL SWITCH

2

ACTIVE

Automation running within your limits.

3

Risk Budget

DAILY LOSS BUDGET	WEEKLY DRAWDOWN	TRADES TODAY
\$0 / \$3,000	0.0% / 5.0%	0 / 4

4

Paper / Live Boundary

Mandatory paper period in progress

Paper trades: 14/20 · Days: 71/14

The paper/live boundary is sacred — crossing it is deliberate, logged, and only possible after this gate passes. This protects you.

5

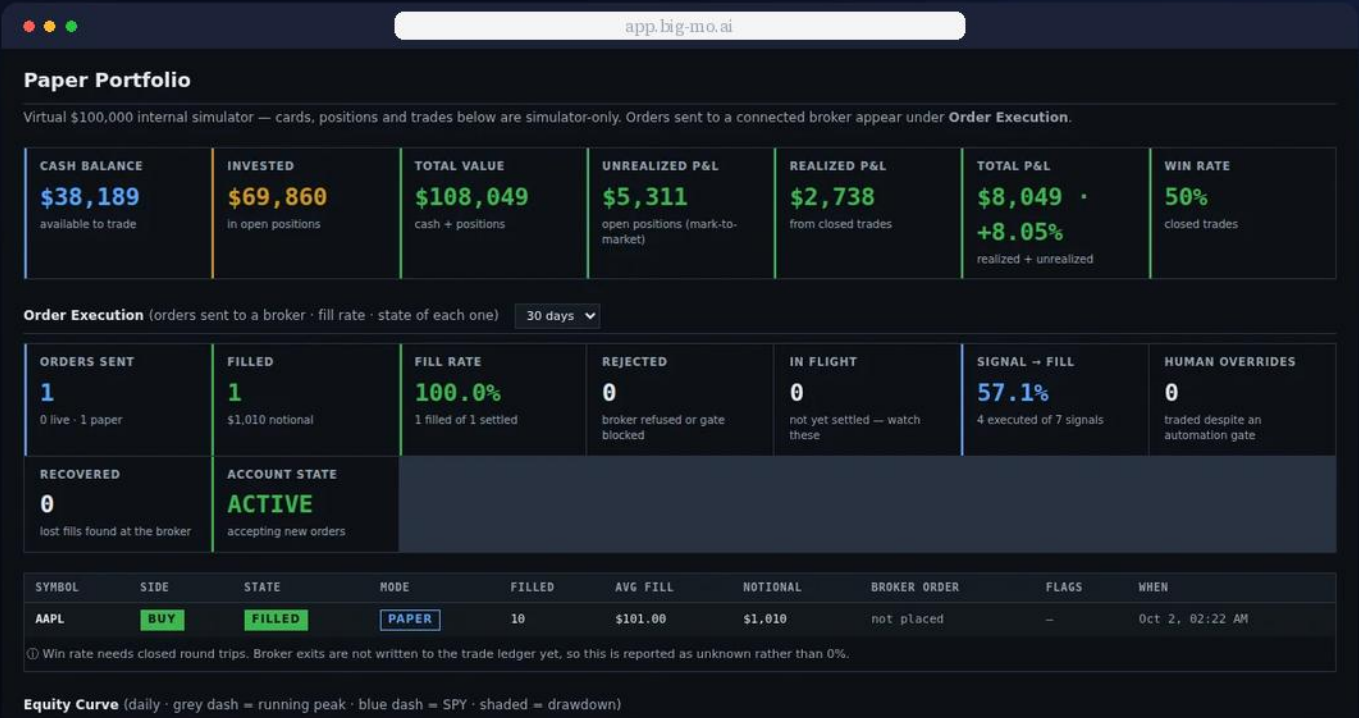

Risk Limits & Filters

These are enforced server-side in the execution path — no order can bypass them. Blank = conservative platform default.

Max daily loss (\$)	3000
Max weekly drawdown (%)	5

Features that aren't allowed aren't loaded.

EDUCATIONAL and SELF_DIRECTED postures decide what is even mounted in the router.

The AI interprets.
Code decides.
The broker executes.
Everything is logged.
